

CooperVision Application & Removal Interactive Videos

CooperVision has developed a fantastic new wearer support resource, now available here:

<https://coopervision.net.au/wearers/new-wearer>

The new online application & removal interactive videos feature real people and guide new wearers (myopia management to multifocal) step-by-step through the application and removal process.

By tailoring the 'how-to- journey depending on the needs of the individual, these videos will help build new wearer confidence. The videos can be stopped/started and patients can jump to the relevant section they need using the playlist. There's also a comprehensive FAQ section covering common concerns.

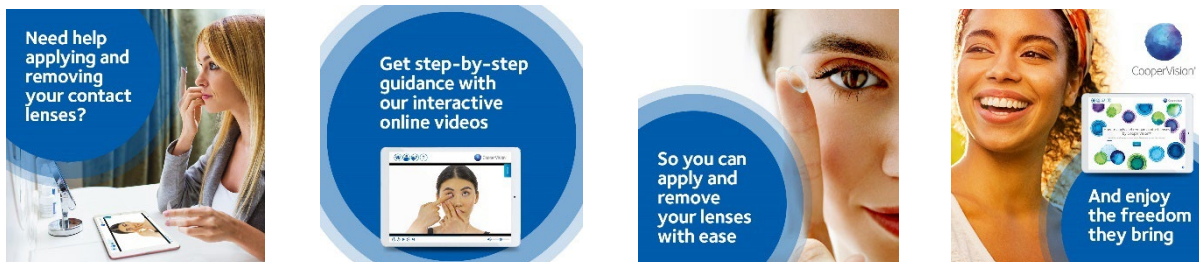

Feel free to bookmark and share this helpful resource with your patients by using the below website banner and suggested social media posts.
